

E&LA 2022

Strategic Measures

	<p>Pursuit of Federal and State Subsidies Advocate for and secure once-in-a-generation public funding to facilitate network deployment that expands the availability of high-speed broadband and helps close the digital divide.</p>
	<p>Fiber/5G Deployment and Permitting Advance policies and processes that facilitate and expedite network deployment of small cells, C-band, fiber, backup generators and other infrastructure.</p>
	<p>National Spectrum Strategy Inform the development of a national spectrum strategy that ensures sufficient access to licensed spectrum, minimizes obstacles created by incumbent users, and advances workable spectrum-sharing regimes and access to additional licensed spectrum resources.</p>
	<p>FirstNet Partnerships Heighten awareness of and adoption of FirstNet services in target markets, and support legislation modernizing the public safety community's use of wireless services.</p>
	<p>Business Transformation and Integrated Legacy Strategy Shape policies that fully enable our ability to retire TDM services and complete the IP network transition. Drive savings through initiatives that streamline our legacy services portfolio and advance the reduction of our copper service footprint.</p>
	<p>Taxes and Regulation At the federal, state, and local levels, work to prevent or mitigate adverse tax and regulatory policies that hinder our ability to create jobs, enhance innovation and generate shareholder value.</p>
	<p>Corporate Responsibility Develop, implement, and promote programs that demonstrate AT&T's commitment to social and environmental sustainability, especially as they relate to the company's external priorities and its key stakeholders.</p>
