

AT&T Boosts Network Speeds in Central Missouri

Network Expansion in Central Missouri Will Help Give AT&T Customers Better Access to Mobile Internet

FULTON, MO; Dec. 20, 2022

What's the news? AT&T* has expanded its 5G network across Central Missouri, giving residents, businesses and visitors a big boost in their wireless connectivity. We've added new cell towers in the 3rd Congressional District to enhance the area's coverage and capacity, and help customers unlock the power of America's Most Reliable 5G Network.¹

The towers are located across 11 counties, including Callaway, Camden, Cole, Franklin, Gasconade, Jefferson, Lincoln, Miller, Montgomery, St. Charles, and Warren. The new site will bring improved coverage in the east side of the city, including in Morningside Park, along the Stinson Creek Trail and in the surrounding area.

Why is this important? We know how important it is for our customers to stay connected. And AT&T 5G brings fast, reliable and secure connectivity to more than 281 million people in over 22,000 cities and towns nationwide. This helps Missouri residents and businesses get the best possible experience over the AT&T network wherever they live, work and play.

These enhancements also bring Band 14 spectrum to the area. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane. In an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. When not in use by FirstNet subscribers, AT&T customers can enjoy Band 14's added coverage and capacity.

Our commitment to Missouri communities: From 2019 to 2021, we invested more than \$2 billion in our wireless and wireline networks in Missouri. These investments boost reliability, coverage, speed and overall performance for residents and their businesses.

¹ Based on nationwide GWS drive test data. GWS conducts paid drive tests for AT&T and uses the data in its analysis. AT&T 5G requires compatible plan and device. 5G is not available everywhere. Go to att.com/5Gforyou for details.

What people are saying:

Rep. Blaine Luetkemeyer (MO-03)

United State House of Representatives

"In today's world, broadband and communication technologies play a vital role in everyday life for the vast majority of Missourians, connecting them to everything from education to family members. I'm always a supporter of private investment in technology that will increase accessibility for our state, and am very pleased that improved wireless coverage will be coming to the Third District."

Craig Unruh

President, AT&T-Missouri

"We want our customers to have a great experience using our services. Investing in our wireless network is just one of the ways we work to provide better coverage for the community and first responders, along with improved network reliability and increased capacity."
